Points about the Project Presentation

Each group will present its work on the project. Each group member should be involved in some portion of the presentation.(20 minutes)

The presentation should show:

1. The final version of the class diagram with a short discussion of any changes that were made
2. A discussion of the use cases you implemented including
   a. A sequence diagram of the success scenario
   b. How the use case was implemented, including
      i. What UI features are involved in the use case
      ii. How the UI communicates with the controller
      iii. What the controller does in response to the request from the UI (to display data, update records, etc)
3. There should be a discussion about decisions you made concerning the design of the UI
